

B.4 HBM and CDM Standards – Recent Advances and Application to Devices

Workshop Moderators: Alan Righter, *Analog Devices, Inc.*; Scott Ward, *Texas Instruments, Inc.*

This workshop will discuss recent advances to the ANSI/ESDA/ JEDEC JS-001 HBM standard (such as Table 2A combinations and sampling advances) and ANSI/ESDA/JEDEC JS-002 CDM standard (such as the new test condition (TC)) methodology and hardware/metrology/calibration). Have a specific question or concern, or have experience with applying these tests to devices, or want to learn more? Please join us in what we expect to be a lively discussion on applications and future directions for both standards.
